

Internal thread cleaners

IRK series: Adjustable internal thread cleaner

The IRK-series adjustable internal thread cleaner is specifically designed for nuts and blind holes with size M60 up to M180.

The cleaning heads are available in various adjustable models that will all cover a certain range of nut sizes. Its clever design allows the operator to easily change the external diameter, making it a versatile solution that is not limited to just one specific bolt size

Imperial sizes and different material brushes are available upon request.

Advantages of the IRK series

- ✓ Each cleaning head covers a wide range of bolt sizes
- ✓ Its extended drive shaft can reach hard to reach places
- ✓ Easy to adjust and maintain

Accessories

Dust extraction for internal thread cleaners

The dust extraction adapter for static brushes is placed in between the drill chuck and the brush and can be connected to a vacuum cleaner. It will then extract dust and other particles away from the operator during the brushing procedure. The dust extraction adapter will fit any **IRK** cleaning head with a size between M60 and M180.

Replacement brushes

BoltClean brushes are made out the highest quality materials. They usually last thousands of cleaning rounds, even under the toughest circumstances. Like other wear items you need to change them at some point to ensure the best cleaning results. That is why we offer spare brushes for all our bolt, thread and nut cleaners. All brushes are made of stainless steel. Every set of replacement brushes contains a replacement for every brush in the tool. Brushes also available in other materials. Please contact us for more information.

Standardized kits

Because of popular demand, we offer standardized thread cleaning kits that include all necessary accessories to get the job done. A standard kit always comes with a cleaning head, electric powered drive, spare brushes and safety goggles. Everything is nicely packed in a protective and durable case with custom made foam inlay.

Kits can be customized by request. Please contact us for more information or pricing.
